Program 2 :-

```cpp
String Freq _count ( vector <string> & str)
{   int freq1 = 0, freq2 = 0;
    unordered _map <string, int> table;
    for (int i = 0; i < str.size(); i++)
        table [str[i]] ++ ;

    for(auto it : table)
    {
        freq1 = max(freq1, it. second);
        if( freq2 < it. second && it. second < freq1)
        freq2 = it. second;

    }
    for (auto it : table)
    {
        if ( it. second == freq2)
            return it. first;

    }

}
```
